WHO WE ARE

DMD Storage Group has been operating for over 20 years. We have continually progressed to become a leading turnkey storage and materials handling solutions provider in Australia.

Our philosophy is to partner with our clients to provide custom solutions that deliver operational excellence and cost efficiencies.

We are in business to solve your storage challenges and turn concepts into functioning solutions.

Our greatest resource is our people - a team of experts who are committed to delivering safe and efficient storage solutions.

WHAT WE DO

Our goal is simple - to deliver safe and efficient storage solutions to businesses and retail clients every day. With years of experience in space optimisation, our team is perfectly positioned to support your operations today and into the future.

DMD Storage Group provides storage solutions, installation, rack audits and maintenance services. All our solutions are designed with operations in mind and provide

maximum functionality and adaptability that enables your business to operate profitably and successfully.

Our turnkey materials handling packages are designed to deliver sustainable innovation and complete efficiency in storage solutions.

With a large inventory of rental and pre-used equipment DMD Storage Group provides the immediate supply of products.

AUTOMATED STORAGE

DMD Storage Group provides automated solutions that deliver cost effective warehousing and materials handling with total efficiency.

Automated storage systems provide up to 85% space optimisation, four times more efficient handling and provide a safer work environment.

Our suite of automated storage and retrieval systems can be utilised in various industries, some of these are automotive, healthcare, manufacturing and machine tool storage.

Products

- Lean Lift
- Rotomat
- Unitower
- Block Systems

Solutions

- Space Optimisation
- Inventory Management

Automated storage systems provide up to 85% space optimisation, four times more efficient handling and a safer work environment.

RACKING

DMD Storage Group provides racking solutions that are changing the way businesses operate. Our racking solutions deliver significant cost efficiencies that enable more economical use of space.

All racking systems are manufactured with superior quality steel which minimises operational damage and reduces ongoing maintenance costs.

With an experienced team of safety and efficiency specialists DMD Storage Group provides annual rack audits and maintenance to ensure compliance to AS4084-2012.

Products

- Selective Pallet Racking
- Double Deep
- Drive-In Pallet Racking
- Carton Live Storage
- Cantilever Racks

Solutions

- Space Optimisation
- Rental Equipment
- Pre-Used Equipment
- Rack & Stack Packages

All racking systems are manufactured with superior quality steel which minimises operational damage and reduces ongoing maintenance costs.

Our team of experts provide turnkey storage solutions.

ACCESS SYSTEMS

DMD Storage Group has extensive experience in custom access systems.

Our team of experts provide turnkey storage solutions.

Our access systems can be easily extended, modified and relocated.

We partner with leading manufacturers to deliver the best product.

RACK AUDITS & MAINTENANCE

DMD Storage Group provides annual independent assessments on the safety of existing racking systems in compliance with AS4084-2012.

The audit includes:

- assessment of damages, overloading and incorrect installation
- training on damage prevention, rack safety and rack protection systems
- efficient space utilisation resulting in increased productivity

Our team of safety and efficiency specialists provide a comprehensive Safety and Audit System manual that can be easily integrated into quality procedures.

QUALITY

The foundation of our reputation for excellence comes from the highest importance placed on Quality. This is demonstrated by our storage solutions having been deployed on some of the most prestigious projects in Australia.

DMD Storage Group is focused on providing superior quality by means of ensuring manufacturing traceability, aligned to best practice International Standards.

HEALTH, SAFETY & ENVIRONMENT PEOPLE

DMD Storage Group is committed to assuring the health and safety of all our people.

The principle of risk reduction and continuous improvement are reflected in our approach to market and is maintained by our people.

We actively utilise manufacturing techniques that minimise environmental impacts and promote a safe working environment.

Our people underpin our success, by delivering world class excellence every time.

DMD Storage Group is committed to investing in the development of our people. We provide ongoing training, development and mentoring whilst providing a working environment that stimulates innovation.
