

GONDOLA SHELVING

The DMD Gondola Shelving System is primarily used in retail stores for merchandise display. Gondola Shelving is easy to install in single or double sided applications and can create feature end units on centre aisles.

Shelving units can be used with or without shelf levels to accommodate accessories. DMD Gondola Shelving Systems are supplied with a comprehensive range of versatile accessories to suit various products. This enables frequent, easy to adapt and user friendly changes to suit the retail environment.

APPLICATIONS:

- Retail outlets
- Hardware storage facilities
- Auto storage facilities

FEATURES AND BENEFITS:

- A variety of sizes available which can be tailored to suit the application
- Metal punch panel backing to suit a range of accessories
