

LONGSPAN SHELVING

The DMD Longspan Shelving System is a robust shelving system that is easy to install and adjust to suit a wide range of storage requirements.

Heavy duty beams are made from a 60mm step beam section with an 18mm recess and has a maximum carry capacity of 750Kg. Standard Heavy duty beams are fitted with a particle board insert. These can also be fitted with wire decking or galvanised steel shelves.

APPLICATIONS:

- Spare parts storage
- Hardware storage
- Retail storage
- Bulky item storage
- Carton storage
- Archive storage

FEATURES AND BENEFITS:

- Heavy duty storage capacities from 450Kg to 700Kg per shelf
- Shelf levels adjust on 50mm increments and include safety locking pin
- Free standing with recessed shelves
- Easy to assemble without tools
- Steel components are powder coated light grey
- Optional wheels available

Frame Height	Frame Depth	Beam Length	Beam Capacity
900mm	450mm	900mm	750kg
1800mm	600mm	1200mm	750kg
2100mm	900mm	1800mm	450kg
2400mm	1200mm	2400mm	300kg
3000mm	-	-	-

**Allow 65 mm per upright frame when calculating the overall length*
